App\Controllers\Formation
Controller\showFormation

App\Core\Controller
\hasAccessToFormation

```
graph LR; A[App\Controllers\FormationController\addOptionsFormation] --> D[App\Core\Controller\hasAccessToFormation]; B[App\Controllers\FormationController\addOptionsFormationPost] --> D; C[App\Controllers\FormationController\showFormation] --> D;
```

The diagram illustrates a dependency or access relationship. Three boxes on the left, each containing a controller method name, have blue arrows pointing to a single box on the right. The box on the right is shaded gray and contains the text 'App\Core\Controller\hasAccessToFormation'. The three boxes on the left are white with black borders and contain the following text: 'App\Controllers\FormationController\addOptionsFormation', 'App\Controllers\FormationController\addOptionsFormationPost', and 'App\Controllers\FormationController\showFormation'.
